#### ACADEMIC DETAILS

Examination	Institute/School	University/Board	Passing Year	GPA/ %
B.Tech(CSE)	DBIT	Uttarakhand Technical University	2023	79%
10+2	ABM Senior Secondary School	CBSE	2019	74%
10	ABM Senior Secondary School	CBSE	2017	9.4CGPA

#### TECHNICAL SKILLS

- Languages (C++, JavaScript),Data Structures,NodeJs,MongoDB,ReactJs,Redis,Socket.io

#### EXPERIENCE

- **Software Engineer, Mobzway Technology | August 2023 - Present**  
Projects that involve building websites using HTML, CSS, JavaScript, and ReactJS. Within these projects, I leverage advanced React concepts such as ContextAPI and Redux Toolkit for efficient state management, enhancing the overall user experience.  
Make 2D game in Phaser like Teenpatti,Rummy,CallBreak and many many more and make game dynamic by handling data from socket and sfs.  
Currently working on a Interview Application as a full stack. In this application anyone can give the interview like other platform and interviewer will check the answer and give you marks and there are so many features in it.
- **Software Engineer Intern, Mobzway Technology | April 2023 - August 2023**
  - Worked in ReactJs Project.
  - Worked in phaser and make 2D games
- **Trainee , EXCAIN LLP | July 2022 - August 2022**
  - Worked in C++ language.
  - Learn Data Structure with real life implementation

#### PROJECTS

- **TRAVELLING WEBSITE**  
It is a travelling website which provides you with all the required information and facilities with respect to the places you want to visit. This website is created with help of HTML, CSS and bootstrap.  
Github link: <https://anuj5926.github.io/travel>
- **CHATAPP**  
FrontEnd is designed in React, backend with Nodejs, use Socket to send real time data to user and mongodb for storing data.In this first user willregister yourself and afterthat he/ she will signup in our app and chat group of user.  
Github link: <https://github.com/anuj5926/chatApp>
- **MOVING BALL**  
It is done in Reactjs as well as in phaser. In this the ball is moving inside the canvas randomly and the button that i have made in react when i click that button the ball directly moves towards the button .  
Github link: <https://github.com/anuj5926/movingball>
- **FORM USING MONGODB AND REDIS**  
FrontEnd is designed in React, backend with Nodejs, use Mongodb to store data and for fast data transfer use Redis. In this we have submit name, Language , input and souce code and i will store it an show in using React.
